

SW5213

SW5213 is a high-yielding variety, with consistent performance and broadly adapted everywhere a FD5 variety is needed for consistent high yield. SW5213 has a highly resistant rating against nine major alfalfa pests and diseases.

Agronomic Traits

- DRI Score: 35
- Fall Dormancy: 5
- Yield: 9
- Winter Hardiness: Hardy

Key Advantages

- Broadly adapted late fall dormant type, to help maintain late summer yield
- Highly resistant to nine major pests and diseases
- High resistance to stem nematodes – can be important in irrigated situations where water source includes tail waters from infested upstream fields
- Well suited for soils with variable drainage due to its strong root rot resistance to Phytophthora and multi-race Aphanomyces
- Excellent overall root rot resistance contributes to persistence in this variety
